# **Fusion Consoles™**

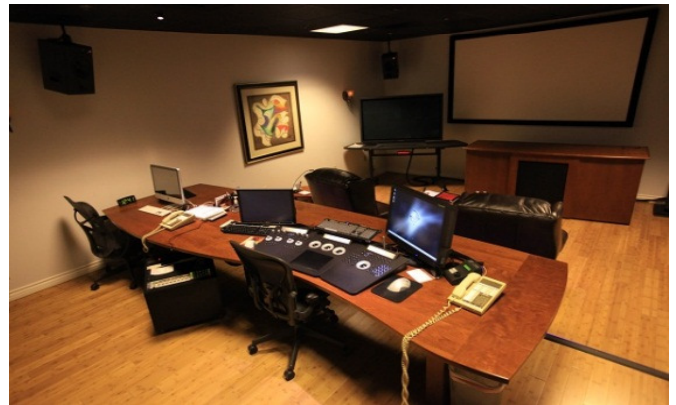

## **The Shape of Things to Come Made in America**

**Your design ideas, the needs of your staff, the ergonomic comfort, your budget... These challenges are the foundation of our Custom Division of Fusion Consoles.**

**We strive to provide the highest standards of design innovations. Our craftsmanship and attention to detail are benchmarks of quality. Our combination of a welded frame and multiple types of finishes assure strength, durability and aesthetics.**

**Our diverse use of materials allows us to tackle projects both large and small. We can design and manufacture a small workstation for a nonlinear editor working out of a home office and match the interior design of that home.**

**We can work as part of a team with architects, interior designers, owners, managers and post production personnel to renovate a large facility. We provide consoles for broadcast, editing, telecine, graphics, command and control, audio post, and digital cinema including ergonomic requirements for sit-stand technology.**

**Whatever your requirements, we will create innovative solutions to meet your design needs and budget. Just call us.**

**Distributed by MARKETEC, a division of Rack Innovations, Inc.
