Fusion Consoles™

The Shape of Things to Come

Made in America

SOLUTIONS

Our Fusion MAC RACK is a beautiful piece of technical furniture that fits into any environment. In its standard configuration, our Mac Rack features 7 rack spaces above or below a shelf made to house the latest Mac computers. As with all of our Under Counter Racks, our quality speaks for itself. Whether you have one of our current modular furniture systems or just need to add a rack system for your Mac, Fusion is the clear choice.

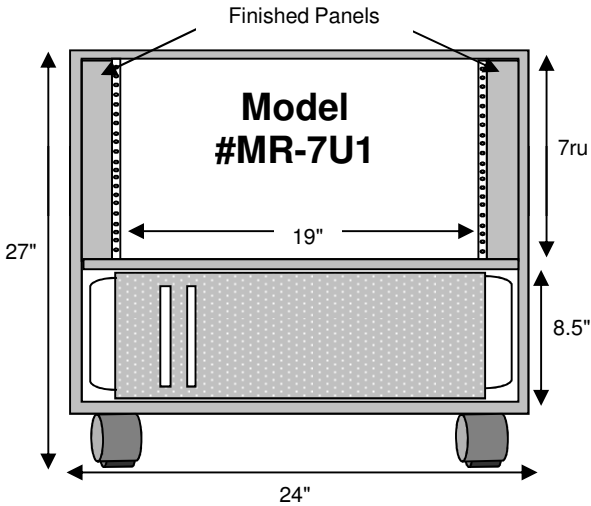

VERSATILITY

With our MAC RACK, the front is the back and back can be the front. Complete with front and rear rack rail, there is no wrong way to rack mount your gear. Our removable sides and lift-off top are an engineer's dream. Our casters are heavy duty and able to withstand the abuse many racks take while being transferred to and from multiple environments.

There are three versions of our Mac Rack.

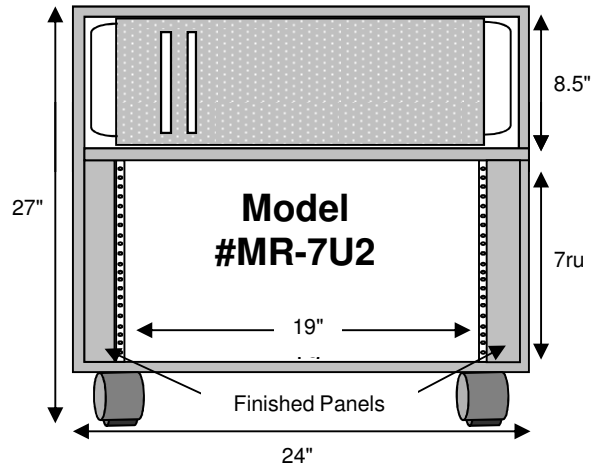

MR-7U1

Our most popular version has the 7 units of rack space at the top of the rack and is 30" deep.

MR-7U2

This model displays the 7 units of rack space at the bottom of the rack and is 30" deep.

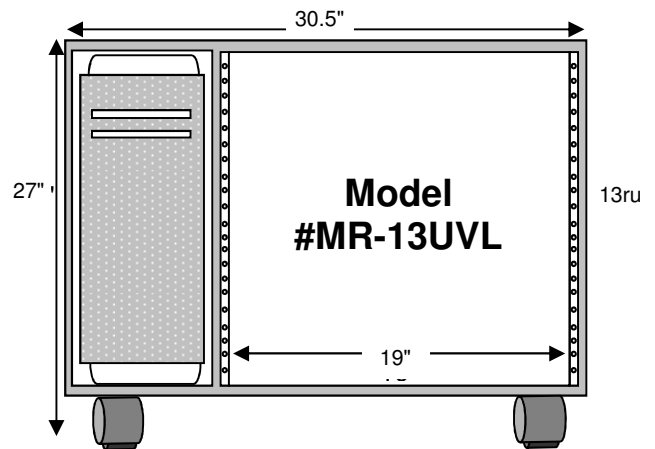

MR-13UVL (or R)

If you have the extra space, the 13UV accommodates the MAC RACK in its upright tower position and offers 13 rack units to the left (or right) of the Mac computer. The "L" designates the position of the computer to the "LEFT" of the rack and the "R" to the "RIGHT" of the rack.

Please specify "L" or "R" when ordering.

This rack is 30" deep.

**FOR OPTIONAL CONFIGURATIONS
SEE PRICING CATALOG**

The Standard Color for our Fusion Consoles™ is Phantom Grey Matrix. Customization of our Products and Colors are available. Just ask us!
